Nordic Energy Services & Blue Planet Energy

Join Forces for a *Greener Education*

15% of Gross Revenue donated to charities that promote education for clean and sustainable energy.

Willowbrook, IL, February 3 – Nordic Energy Services, LLC, a leading alternative energy supplier throughout Illinois and NW Indiana, is partnering with Blue Planet Energy on a new “green” energy education initiative. Nordic Energy and Blue Planet Energy, an Illinois-based electricity marketer, recently reached an agreement for Nordic to be Blue Planet’s primary supplier of electricity.

“It was very important for us to partner with a local, flexible and innovative organization for this initiative,” said Craig Schuttenberg, President of Blue Planet Energy. “Working with Nordic will give us the opportunity to significantly expand our donations to energy and environmental education programs for K-12 students.”

The agreement incorporates Blue Planet Energy’s core value of supporting environmental education. A donation totaling 15% of Blue Planet Energy’s gross revenue from electricity supplied by Nordic Energy will be donated to 501(c)(3) not-for-profits that promote education on energy, the environment and sustainability for students K-12. Currently donations have been made to four programs: Education and Actions for a Sustainable Energy Efficiency (www.EASEE-USA.org); Alliance to Save Energy Green Schools (www.ase.org/programs/green-schools-program); “e” inc. (www.e-action.us); and Solar One (www.solar1.org). Clients also have the option of directing donation dollars to a 501(c)(3) charity of their choice that specializes in green education programs.

Nordic Energy Services supplies both the commercial and residential markets with natural gas, electricity and renewable, “green” energy. “Developing ‘green’ education programs to help our future is very important to our organization,” said Jim Deering, President of Nordic Energy Services. “We are committed to supplying green energy solutions to our customers and we’re excited to partner with Blue Planet on educating the youth of tomorrow on this important issue.”

While Blue Planet Energy started the donation program last year, this is the first year partnering with Nordic Energy Services. Nordic Energy Services brings many years of industry experience to the program and an established record for a high standard of service and quality products. For questions regarding donations and charities meeting the stated criteria, please contact: info@blueplanetenergy.net.

Blue Planet Energy is a joint venture of Energy Choices, P.C. and Satori Energy, two experienced and well-established companies that provide energy consulting and broker services to large commercial, industrial and institutional customers. Blue Planet Energy provides its clients a unique economical and environmentally beneficial opportunity to purchase competitively priced electricity from our Retail Electricity Supplier and, at no extra cost, support educational organizations that focus on improving the current state of our environment.

Nordic Energy Services, LLC (www.nordicenergy-us.com), is an independently owned, Chicago-based, Alternative Retail Electric Supplier (ARES) and Alternative Gas Supplier (AGS). Nordic Energy supplies natural gas and electricity and provides related services to commercial customers behind five utilities in Illinois and Indiana. Nordic Energy also designs customized risk management and hedging solutions, energy scheduling, bill audit services and other energy-related consulting services. Beginning in March 2011, Nordic will offer electricity to residential consumers throughout Illinois. Working toward a fully integrated energy provider, Nordic also produces oil and natural gas.
